Safety Gates

Hemco's industrial steel framed Adjustable and Standard sized Safety Gates provide openings and access points with protection and easy accessibility for loading and unloading operations. Designed to self-close the Hemco Safety Gate provides each vulnerable access point with the up-most security and assures safety for all those passing by. Both designs are engineered with round section tubular frames and universal mounting features to allow for easy installation with adjustable sizing and swing direction. Not only is the Hemco Safety Gate essential for assuring the safest operations, but this product is also fabricated to meet OSHA standards.
