

### Product Benefits

- Durable, slip-resistant grated walkways to prevent falls and accidents
- Less than 30lbs of pull weight to retract, minimal operational efforts
- Upright, locked storage position
- Adjustable platform extension mechanism
- Standard galvanized carbon steel construction
- Reliable, low-maintenance gangway design
- Bolts directly to your existing rack/stringer

## The Titan Gangway

When you're looking for superior fall protection and access to rail cars or tanker trucks, the Titan is a proven, cost-effective way to improve safety and maximize personnel productivity. With precise engineering the Titan allows for the maneuverability required for safety and efficiency in modern day loading. The Titan can be configured to fit your specific bulk loading and transport needs. Below are some standard features for HEMCO's Titan model gangways:

Features & Options
Sloping Platform
Platform telescoping extension
Standardized Sizing
Optional Widths and Lengths
Optional Hydraulic Lift and Platform Extension
Optional Platform Material (AL, Fiberglass, etc.)
Optional Safety Self-Leveling Cages/Enclosures
Optional Pivot Mount: 22.5 Degrees to the Left and 22.5 Degrees to the Right

Use our Titan gangway to open hatches, access the top of vehicles, connect hoses, and provide safe employee access to railcars, tanker trucks, and other vehicles/places. Whether you need to retrofit your gangway to existing equipment or configure your gangway for a new platform or loading rack, Hemco will provide a solution.
